REFERENCES

Available on request.

My experience in Cyber Security and Web development has always been the greatest positive challenge to perfect my skills.

My background in Computer Science represents a unique combination of disciplines and technical approach to further my interest and passion in IT security and development I am equipped with the ability to plan, install, configure and optimize the IT infrastructure to consistently achieve high availability and performance. I am entrusted to ensure that day-to-day running of ICT processes are running well to realize the company's business continuity. I am currently looking to secure a position in a fast paced environment as an IT officer with a goal to develop, implement, secure and support ICT solutions.
